Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 3, drawn to a sleeve of elasticated netting, classified in class 428, subclass 36.9.
 - II. Claims 4 – 5, drawn to a method of manufacturing a sleeve, classified in class 264, subclass 177.2.
2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different method, such as sewing into the sleeve a longitudinal seam which is not offset from the center of the sleeve.
3. Because these inventions are distinct for the reasons described above, and have acquired a separate status in the art because of their recognized different classification and subject matter, and because the searches required for the groups are not the same, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Joseph Bain on June 20, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1772

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
